Dear Sirs,

Re: US Patent application Number 09/921,552 filed 08/06/2001  
Philip John MARTIN, Tag and Receiver Systems

I am writing further to the Office communication of April 9, 2004.

I hereby request that further prosecution of the application is based upon invention III (Claims 64-77). (For the sake of completeness it is noted although Claims 59-63 refer to a radar detector, Claims 38-47 are not directed to a radar detector per se but to any form of detector with the claimed features). I reserve the right to file one or more divisional applications for the subject matter of claims 1-63.

**RECEIVED**

Yours faithfully,

MAY 12 2004

Technology Center 2600

A handwritten signature in black ink that reads "P. J. Martin" with a horizontal line underneath.

Dr Philip J. Martin
